

Cardio Cocktail™

The Power of One

The Situation

In this fast-paced world, there are many things we must juggle every day. Career, family, and school are just a few of the activities that make up normal life in America. With the hurried pace of our lives, it has become increasingly difficult to enjoy a healthy lifestyle complete with exercise, plenty of rest, and a highly nutritious diet.

Statistics indicate that the number of people struggling with low energy, stiff joints and other challenges is skyrocketing. The good news is that more and more people are looking for ways to improve their health. But, how do we give our bodies the fuel that it needs in order to perform at optimum levels?

The Solution

Cardio Cocktail™ provides your body with a host of essential vitamins, minerals, amino acids, antioxidants, and other vital nutrients. Born in a blend of potent antioxidant juices, Cardio Cocktail™ delivers results in a highly absorbable, great-tasting liquid. In just a few seconds each day, you can give your body a powerful dose of science-based nutrition.

The Nobel Prize Winning Research

In 1998, a team of American scientists won the Nobel Prize in Medicine for their discovery of the nitric oxide pathway. Nitric oxide is a powerful substance that helps to promote optimal blood flow and maintains smooth, Teflon-like texture of arteries.

Inside the artery, there is an inner lining called the endothelium. When nitric oxide is present in adequate amounts, the endothelium is smooth and tough like Teflon. When there is an inadequate amount of nitric oxide, the lining in the walls of their arteries becomes sticky, like Velcro.

So, how do we benefit from this Nobel Prize-winning research? The answer is a naturally occurring amino acid called L-Arginine. L-Arginine is the precursor to nitric oxide. Your body converts L-Arginine into nitric oxide that maintains healthy blood vessels and allows blood to flow efficiently and smoothly throughout the body.

The Product

Cardio Cocktail™ is a powerful blend of nutrients containing five grams of L-Arginine per ounce, plus vitamin D, B-vitamins, EDTA, Omega 3 fatty acids, OPC's from grape seed extract, and minerals. Cardio Cocktail™ is a great-tasting liquid product utilizing a potent blend of fruit juices including açai, goji, mangosteen, tart cherry, and red raspberry that is quickly absorbed by the body via our proprietary fulvic mineral delivery system.

L-Arginine

L-Arginine is the precursor to nitric oxide. The body converts L-Arginine to nitric oxide. L-Arginine has been proven to support a healthy cardiovascular system. Cardio Cocktail™ delivers five grams of pure grade L-Arginine per ounce.

Omega 3 Fatty Acids

According to the American Heart Association, omega 3 fatty acids are a great way to support cardiovascular health. Cardio Cocktail™ uses Perilla oil as its source of omegas. Perilla oil is a plant-derived ingredient that is higher in omegas than flaxseed oil. Since Perilla oil is plant-derived, there is no concern with fish allergies or mercury poisoning. And, it does not taste and smell like raw fish.

Antioxidants

Cardio Cocktail™ is filled with a variety of antioxidants including OPC's, or oligomeric proanthocyanadins, and polyphenols from grape seed extract. They include xanthenes from mangosteen and polysaccharides from goji. These elements are many times more potent as antioxidants than vitamins. Antioxidants are proven to help the body maintain health.

Adaptagens

An adaptagen helps all the systems of the body to better deal with the stresses of life. The açai berry is an all-natural super food that is harvested in the Brazilian rainforest. The natives of Brazil have used the açai berry for thousands of years, and it is believed to have amazing healing and nutritional properties. Açai is the only known super fruit that contains a complete array of vitamins, minerals, and essential fatty acids. The açai berry contains B1, B2, B3, vitamin E, vitamin C, phosphorus, calcium, potassium, fiber proteins, Omega 6, Omega 9, and many more nutrients.

Vitamins

Cardio Cocktail™ is fortified with vitamins A, B1, B2, B3, B6, B12, C, and D. These vitamins have been shown to support cardiovascular health, healthy vision, and proper brain function.

The research of vitamin D is showing some very promising benefits. Vitamin D is a fat-soluble vitamin that is essential for maintaining normal calcium metabolism. Vitamin D maintains serum calcium and phosphorous concentrations by enhancing the efficiency of the small intestine to absorb these minerals from the diet. Maintenance of normal serum calcium levels is vital for normal functioning of the nervous system as well as for bone growth, maintenance of bone density, and healthy teeth. There is also considerable scientific evidence that vitamin D has a variety of effects on immune system function that may build the immune system.

Minerals

Fulvic minerals are naturally occurring, plant-derived minerals. The fulvic minerals act as a transporter for the Arginine and antioxidants. The fulvic minerals help to increase the ease with which the body absorbs the nutrients.

Cleansing

Cardio Cocktail™ includes EDTA to aid the body in the removal of toxins and other harmful elements. EDTA has been used for decades as a cleansing agent.

The Proprietary Super Fruit Juice Blend

Cardio Cocktail™ employs a potent blend of some of the most nutritious fruit juices on the planet goji from the Himalayas, açai from the Brazilian rainforest, mangosteen from the Sunda Islands, red raspberry from the state of Washington, and tart cherry, grown primarily in Michigan. The benefits of these juices individually are legendary. When combined they create a blend that your body will love.

Cardio Cocktail™ Benefits

- More energy
- Supports cardiovascular health
- Supports healthy vision
- Supports healthy sexual performance
- Contains cognitive nutrients that support proper brain function
- Packed with valuable and beneficial antioxidants
- Daily vitamins and minerals
- Omega fatty acids
- All your daily nutrition in a single highly concentrated dose, plus much more
